## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The patent term adjustment to date is 80 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 80 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

## Notice of Possible Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1 and 3-7 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach a linear motor having a magnetic member with a plurality of slots formed in series on both sides of a magnetic member thus making a pair of slots and with pairs of slots extending in an axial direction along the magnetic member with coils of a plurality of phases wound in the pairs of slots so that each pair of adjacent phases are different in electrical angle from each other as recited in claim 1. The prior art of record does not disclose or teach a method of producing a linear motor comprising preparing a magnetic member having a plurality of slots extending from both sides and extending along the axial direction, the plurality of slots having windings opposing field magnets extending in an axial direction, said field magnets each having a plurality of pairs of magnetic poles magnetized in the axial direction as recited in claim 7.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In the office action of 6/11/02 in the Allowable Subject Matter heading a sentence appears "Kato teaches adjusting the phase angle of the power applied to the windings by means of a control system, which is another method of smoothing the power applied to a motor." A citation for Kato is included in this office action. Ishiyama discloses magnets where a plurality of pairs of field magnets are magnetized in an axial direction. Ishiyama does not disclose a magnetic member with a plurality of slots on both sides of the member and axially extending

Art Unit: 2834

along the member. No reason has been found for combining LaFrance, Barrett et al. and Ishiyama together to make the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
